

### Records of Society's Scientific Meetings

*There appears to be no detailed records retained of the Meetings of the Neuropathology Club other than the list kept in a separate loose leaf binder which notes only the attendance of the members and whether they read a paper or gave a demonstration. The dates and venues are listed here from that document.*

\* indicates that a programme of the meeting is held. Many of these Documents were kindly donated by Dr A.C.Palmer and are often annotated by him. Abs. = Abstract present  
There are spare copies of some Meetings at the back of the folder.
