

Compendium of UK Neuropathology Units

This compendium was collated by online survey email in 2021 and is an update on the previous compendium of 2015-2016 compiled by Dr Robin Highley titled "Compendium of UK Neuropathology Units".

The Compendium provides a snapshot indication of the consultant/trainee complement, biomedical scientific support, directorate status, areas of particular expertise and multidisciplinary meetings. There are links also to department websites (where available) and up to date email addresses.

Best regards

Kathreena Kurian and Piyali Pal

October 2021

Name of Institution	Addenbrooke's Hospital CUH
